

Loon Lake School District

Policy  
Personnel

BP 5335

Staff Wellness

The district will maintain, as revenues permit, a wellness program designed to provide opportunities to improve the health and well-being of staff members. Just as the climate of the school impacts the performance of students, the performance of the organization is dependent on the health of the organization as well as the wellness of individual staff members.

For purposes of this policy, wellness involves but is not limited to basic lifestyle choices in key areas such as physical fitness, stress management, nutrition and health risk reduction.

To this end, the superintendent is directed to organize and implement a voluntary wellness program for all staff members of the district. In developing the program, the superintendent will seek and solicit the involvement and support of staff in developing and implementing a program.
